

Senior Geoscientist

Finder Exploration Pty Ltd is a private oil and gas exploration company based in West Perth. We are a fast growing and dynamic company with a track record of success who currently has interests in 13 exploration permits offshore north-western Australia (of which we operate 12) and 5 in the Walton Basin (offshore Jamaica) covering a total of 61,000 km².

Further details of the company and our assets are available at www.finderexp.com.

In 2010 Finder is embarking on a significant 3D seismic data program of nearly 4,000 km² across 7 Australian permits and consequently we are looking for a self motivated individual to join our team and fill this role of Senior Geoscientist.

The successful candidate will have the following responsibilities:

- To perform and manage significant technical assignments requiring high level 2D and 3D seismic interpretation and geoscience expertise, optimising the use of all available data to conduct regional geophysical studies to assess hydrocarbon prospectivity;
- To mature prospects and leads to drillable status focussing on prospectivity and the quantification of risk and uncertainty; and
- To present and report the results of work to peers, management, joint venture parties and/or prospective farminees.

To be successful you will have demonstrated experience with all aspects of maturation of prospects and leads, from well ties and seismic interpretation to time and depth mapping, risk and resource quantification. Experience in offshore Australian basins and a familiarity with “high-end” geophysics will be highly regarded. A high level of proficiency with the SMT Kingdom interpretation software and some exposure to drilling would be preferred.

You will have a broad knowledge of the principles and practices of basin and petroleum systems analysis, play fairway mapping and prospect generation, gained typically through a minimum of 8 years of industry experience.

The successful candidate will need to be adaptable, hard working, organised, a team player and keen to work in a fast paced environment. You must be open to new ideas and driven by team success.

This is a great opportunity to join a small and fast growing team that is not afraid to challenge existing exploration paradigms.

Enquiries and Applications will be treated in strict confidence and should be directed to:
Christine Taylor, Office Manager
Email: c.taylor@finderexp.com

Applications close Friday 10 September 2010
